Structural Engineer in Training

Office Location: Wyomissing, PA

Salary: Commensurate with experience

Job Description

RPA Engineering is seeking a Structural Engineer in Training. This individual must be capable of working in an interdisciplinary environment as a contributing team member and independently on a wide variety of projects. This individual will be responsible for performing structural design for buildings, load calculations, and structural analysis. This position is the perfect opportunity for an outgoing, hard-working engineer to hone their skills in structural engineering by working directly on all phases of projects!

Education/Experience:

- 0 to 3 years structural engineering experience.
- Structural Engineering, Bachelor of Science.
- Candidates should already have taken their Fundamentals of Engineering Exam.
- Working knowledge of structural analysis software. RISA3D experience highly desirable.
- AutoCAD and Revit experience a plus.
- Highly innovative thinker, engaging in continuous improvement opportunities.
