

ELECTRICAL ENGINEER

Salary: Commensurate with experience

Job Description

RPA Engineering is looking for an electrical engineer to support project related work. The candidate will focus on production of construction documents, including drawings and specifications for commercial and industrial projects. Ability to work independently and collaboratively with multi-disciplinary teams. Self-starter who takes direction well and is driven to expand their knowledge-base.

Education/Experience:

- 2-10 years of electrical engineering experience
- A.S. Electrical Engineering or equivalent Technology degree required / B.S. Electrical Engineering a plus. Equivalent work experience may be accepted for otherwise well-qualified candidates.
- Engineer-in-Training Certificate or Professional Engineering licensure in the state of Pennsylvania required
- Strong technical background with Programmable Logic Controllers (PLC) and Variable Frequency Drives (VFD).
- Possess the ability to design electrical systems in addition to drafting/modeling skills.
- Experienced in managing contract resources and working with outside suppliers.
- Familiar with electrical codes including the NEC.
- Knowledgeable in Oracle Business system, MS Word, MS Excel, MS Project, Revit, and AutoCAD.
- SKM or ETAP software experience is a plus
- Capable of working independently and within a team framework.
